PROFESSIONAL SUMMARY

Aspiring Software Engineer and Computer Science student with hands-on experience in Python programming, full-stack web development, and interactive software architectures. Certified in Full Stack Development and Generative AI, with strong foundational domains in problem-solving, object-oriented programming (OOP), data structures, and debugging. Proven track record of delivering clean, scalable, and fully functional applications, looking to leverage technical expertise in an engineering role.

EDUCATION

Institute of Engineering and Technology

Bachelor of Technology (B.Tech.) – Computer Science and Engineering

- Academic Performance: Semester 1: 74.07% | Semester 2: 72.00% | Semester 3: 75.96%

Sitapur, India

2024 – Present

Kendriya Vidyalaya Lakhperabagh

Class XII (CBSE Senior School Certificate Examination)

- Aggregate Academic Performance: 76.00%

Barabanki, India

2023

Kendriya Vidyalaya Bhinga

Class X (CBSE Secondary School Examination)

- Aggregate Academic Performance: 91.80%

Shravasti, India

2021

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3

Core Engineering: Data Structures, Object-Oriented Programming (OOP), Software Development Lifecycle (SDLC)

Tools & Platforms: Git, GitHub, Visual Studio Code

AI & Automation: Generative AI Frameworks, Advanced Prompt Engineering, Productivity Automation Tools

PROFESSIONAL EXPERIENCE

UpskillCampus

Python Development Intern

Virtual

June 2025 – July 2025

- Developed a highly interactive Quiz Game Application, structuring complex game logic, multi-choice validation matrices, and dynamic tracking layers to improve processing speed.
- Enhanced application readability and user flow by designing an elegant, bug-free interactive command-line operational framework.
- Optimized software lifecycle workflows through structured testing, continuous debugging routines, and aggressive execution profile optimization.
- Applied key data structures, loop optimizations, and modular functions to deliver full-scale project deliverables within rigid enterprise sprint limits.

TECHNICAL PROJECTS

GUI Calculator | Python, Tkinter

Personal Project

- Engineered a desktop arithmetic computing matrix using Tkinter GUI, utilizing event-driven structures to maximize input processing responsiveness.

Tic-Tac-Toe Engine | Python

Personal Project

- Built an interactive stateful game engine using algorithmic validation layers to continuously scan grid layouts and manage automated winner arbitration loops.

Modular Quiz Architecture | Python

Academic Capstone

- Architected a decoupled, scalable question parsing engine featuring real-time input filtering, absolute grading computations, and extensible question bank file integrations.

CERTIFICATIONS & CREDENTIALS

- Full Stack Development Graduate Certification** – Simplilearn
- Introduction to Generative AI Core Certification** – Industry Standard
- Advanced AI Productivity Tools Masterclass** – Be10X
- Enterprise Python Development Engineering Internship Credentials** – UpskillCampus
